1. Claims 84-122 are pending.

Reasons for Allowance

2. Previously Claims 84, 85, 99, 100, 114, and 115 were rejected as being anticipated under 35 USC 102(e) by "Information Security Policies and Procedures" by Peltier.

The Applicant has amended into the independent claims, the additional recitation of including in the security policy "settings of individual equipment components within the organization that implements the security policy"

An additional search of the prior art conducted 3/31/07 has uncovered US patent:

DOCUMENT-IDENTIFIER: US 5164988 A

TITLE: Method to establish and enforce a network cryptographic security policy in a public key cryptosystem

5164988 enforces a security policy based on the individual settings or configurations of the devices, but does not store them within the security policy. Specifically, they are not included within the policy.

Accordingly the rejections under 35 USC 102(e) have been withdrawn. No motivation has been found to combine or alter the security policy of claim 1 to include settings of individual equipment components in the security policy. Although other patents such as US patent

Art Unit: 2132

5164988 demonstrate security policies are frequently used to check device settings, for example cryptographic devices, no motivation has been found to include the actual equipment setting within the security policy document. Indeed, one of ordinary skill in the art would construe such specific details as subject matter better placed in other memory locations.

Additionally, the Applicant's amendments have overcome the deficiencies under 35 USC 112 and 35 USC 101.

For these reasons claims, 84-122 are allowable.
